On September 1, 1939, Germany invaded Poland, leading to the beginning of World War II. Great Britain and France responded by declaring war on Germany. Germany was ruled by a dictator named Adolf Hitler, who was the leader of a Nazi political party. The German allies, countries that fought Germany, were called the Powers of the Wasps. Italy and Japan were two of these countries. Both the Soviet Union and the United States entered the war two years later and allied with British and French resistance to the Nazis. These, along with China, were known as allied powers. The United States, Great Britain, France, and the Soviet Union fought the Wass powers in Europe and North Africa. In the Pacific, the US, along with China and the UK, fought with the Japanese throughout Asia. Allied forces were approaching Berlin, Germany surrendered on May 7, 2014. This date is known as VE Day (Victory in Europe). The Japanese government did not give up until 15 December 2008. This date is called VJ (Victory in Japan) Day. A total of 20 million soldiers and 50 million civilians have died in the global conflict, including an estimated 6 million people, mostly Jews, killed in the Holocaust. World War II was the defining event of the mid-20th century. You can choose to print all these Halloween coloring pages or color them online. Halloween coloring book from Hello Kids Continue to 17 of 19 below. Science is usually a topic for children with high interest. Children love to know how and why things work, and science is part of everything from animals and earthquakes to the human body. Take advantage of your student's fascination with science-themed topics by incorporating fun prints and practical educational activities into your scientific studies. It is never too early to start teaching children to document their scientific laboratory findings. Teach them to make a hypothesis (educated guess) about what they think the outcome of the experiment will be and why. Then show them how to document the results using scientific report forms. Meet the men and women behind today's science with free papers, such as Albert Einstein's printable sheets, where students can learn about one of the most famous scientists of all time. Spend some time researching the tools of a trade scientist, such as parts of a microscope. Study general scientific principles – which people use every day, often without realizing it – such as how magnets work, the basics of Newton's laws of motion, and the functioning of simple machines. Earth, universe, planets and stars are fascinating for students of all ages. Studying life on this planet - and in space - is a topic worth delving into with its students. Students can ascend to heaven with astronomy and space exploration printables. Study weather and natural disasters such as earthquakes or volcanoes. Discuss the types of scientists who study these disciplines, such as meteorologists, seismologists, vulcanologists and geologists. Spend time outdoors creating your own rock collection and inside learning about them with stones printables. Children love learning about the creatures they can find in their own backyard. Spring is a great time to study birds and bees. Meet lepidopterists – scientists who study moths and butterflies – and entomologists who study insects. Plan a trip to the beekeeper or visit the butterfly garden. Visit the zoo and learn about mammals such as elephants (thick-skinned animals) and reptiles such as alligators and crocodiles. If your young students are fascinated by reptiles, print reptile coloring book for them You can have a future paleontologist in your classroom or homeschool. If so, visit the Natural History Museum to learn about dinosaurs. Then, capitalize on this interest with a set of free dinosaur printables. As you study animals and insects, discuss how the seasons — spring, summer, autumn, and winter — affect them and their habitats. Oceanography is a study of the oceans and creatures that live there. Many animals who call the ocean home are very unusual looking. Help students learn about the mammals and fish that inhabit the oceans, including dolphins, whales, sharks and seahorses, as well as: CrabsJellyfishManateesOctopusesSea TurtlesStarfish Pak, dig deeper by examining more facts about dolphins, seahorses, and even lobsters. Updated Kris Bales There are 50 free, print Mother's Day coloring pages all over the GetColoring site. You will find pictures of hearts, flowers, gifts, animals, cards, awards, moms, children, cakes, ribbons and more. Click a thumbnail of a color page to print, rate, or add it to your favorites.
